

AS-Interface System – MAI68

The I/O modules with round cable bus connections in the **MAI68** product range have been designed for exposed areas with extremely stringent tightness requirements. They provide a comprehensive solution with protection class IP68/69K.

Industrial strength watertightness – through full encapsulation and seals

- high resistance to impact and vibration through encapsulation
- voltage-reversal prevention through coded elements
- resistance to a wide range of media

→ avoidance of wiring errors and outages

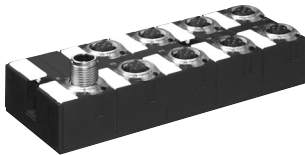

I/O modules

with M8 connections and protection IP68/69K
8 inputs (AB)

from page 2.9.2

with M12 connections and protection IP68/69K
4 inputs (AB)
4 inputs and 4 outputs

from page 2.9.3
